

COASTAL WiFi

GO BEYOND

basic wireless and reach new heights!

It's time to improve the way your customers experience the internet while adding a vital amenity to your business.

Wireless connectivity makes a business more attractive, competitive, and more modern by enabling users to make use of high-speed Internet Services that are fast and easy. With simplicity, reliability, and efficiency at our core, we are revolutionizing wireless delivery of Internet services to businesses of all sizes.

“ Small businesses that offer Internet access, such as a coffee shop or a hotel or even a car mechanic with a waiting area, should be aware of the industry's crackdown on piracy and take steps to ensure their customers aren't using the service to steal content... Some people don't want to pirate music from home because they're afraid of getting caught, so they'll use the Wi-Fi connection of a neighbor or the coffee shop down the street. ”

MELISSA PAVLICEK; HAWAII STATE DIRECTOR, NATIONAL FEDERATION OF INDEPENDENT BUSINESS

bizjournals.com July 18, 2011 article

SECURE

Built in firewall prevents public users from accessing your wired Network or the optional private Wireless Network. Optional Web Filtering to block inappropriate website and promote a family friendly environment.

STABLE

Our wireless technology includes a hardware that will restart the router should it lock up due to environmental or power spikes or short outages. This greatly minimizes downtime.

SAFE

We provide your wireless connection with legally compliant terms and conditions. We also ensure you, yourself are compliant with your ISP's terms and conditions for providing public wifi service.

SCALABLE

We customize the wireless system to your needs. Wireless in your home or your hotel, 5 users or 5,000 users. Indoor units or outdoor units for poolside access.
